Technical Skills

Active Record	Express	Jasmine	Rails
AJAX	Git/GitHub	JavaScript	RSpec
AngularJS	Gulp	jQuery	Ruby
Bootstrap	Handlebars.js	MongoDB	Sass
Chai	Heroku	Mongoose.js	Sinatra
Cordova	HTML5	Node.js	
CSS3	Ionic	PostgreSQL	

Projects

LivingQuarters   Heroku / Github

LivingQuarters is a hybrid mobile app that serves as a comprehensive household organizational tool. Users can join a house and manage chores, shopping lists, and household announcements.
- Responsible for user interface design and front-end development using AngularJS and Ionic.
- Pair programmed to build out back-end API and database structure with Express and MongoDB.
- Technologies used: Node.js, Express, MongoDB, Mongoose.js, Javascript, Sass, AngularJS, Ionic, JWT.io, Apache Cordova.

Love At First Bite   Github

Love At First Bite combats food waste by making it easy for large grocery chains to donate unwanted produce. Users search for local produce offerings and post their own donations.
- Designed user interface and built back-end database/web server with RESTful conventions.
- Technologies used: Ruby on Rails, Active Record, PostgreSQL, bCrypt, Sass, Action Mailer.

Hangry Mouse   BitBalloon / Github

Help the hungry mouse navigate San Francisco on a magical Muni line!
- Designed and built entire browser game after two weeks of learning front-end basics.
- Selected from 26 students to present project before prospective Adobe scholarship directors.
- Technologies used: HTML, CSS, Javascript and jQuery.

Experience

Full Stack Web Developer, General Assembly   Jan 2016 — April 2016
- Designed and built fully functional web applications in both the MEAN and Rails stacks.
- Collaborated with other developers and incorporated industry best practices, including user stories, wireframes, pair-programming, RESTful conventions and TDD.
- Built out multi-model backend functionality using a variety of databases and ORMs.

Medical Assistant, Golden Gate Obstetrics and Gynecology   Aug 2013 — Nov 2015
- Supported a team of nine surgeons and their patient base of over 20,000 individuals.
- Interacted daily with dozens of patients and physicians while working in a fast-paced healthcare environment.

Creative Team Intern, Havas Worldwide San Francisco   May 2012 — April 2013
- Worked alongside designers and project managers building digital advertising campaigns for gaming, biotech, and governmental agencies.
- Analyzed market and consumer trends and helped develop pitch proposals.

Education

General Assembly   Jan 2016 — April 2016
12-week intensive web development program covering the full stack in JavaScript and Ruby.

UC Berkeley   Aug 2009 — May 2013
BA Integrative Biology: Human Biology and Health Sciences. 3.7 GPA.
